Sabit Al Hasan

Ecommerce and Digital Marketing Intern | CSE Graduate

CSE graduate building practical ecommerce and digital marketing experience through structured learning projects. Familiar with product research, SEO, social media planning, content creation, Google Ads and Merchant Center workflows, and AI-assisted creative production. Brings technical problem-solving, organized research, and clear customer-focused communication.

ECOMMERCE AND DIGITAL MARKETING TRAINING

Selected Learning Projects - Shopify / Ecommerce Store Exercise | 2026

Project-based training; not presented as paid client employment.

- Researched and validated ecommerce product ideas through demand signals, competitor comparisons, supplier shortlists, risk analysis, and estimated landed-cost modeling.
- Practised product and brand messaging through product descriptions, SEO blog topics, email and SMS copy, social captions, customer objections, safe-claim rules, and reusable AI prompt templates.
- Mapped SEO keywords to product, collection, and blog pages; prepared five product-page optimization drafts and three collection-page rewrites.
- Prepared SEO audit and technical-fix notes covering metadata, crawlability, indexing, canonical and redirect patterns, JavaScript rendering, duplicate metadata, and Search Console coverage exports.
- Planned Instagram, Facebook, and TikTok content strategies, including posting frequency, content pillars, hashtags, a monthly calendar, unified-inbox replies, escalation tags, and a weekly KPI report template.
- Prepared draft Meta Ads, Google Ads Performance Max, Google Merchant Center, product-feed, and Google Vids video-ad workflows as training deliverables.

TECHNICAL FOUNDATION

Full-stack web development, ecommerce applications, authentication, payment integration, REST APIs, databases, real-time systems, computer vision, research documentation, and technical problem-solving.

RESEARCH

Computer Vision Research

Designed a CNN-based pipeline for concrete-crack detection and severity classification using TensorFlow, Keras, and data-processing workflows. Authored a research paper accepted for oral presentation at ICACIT 2024.

ADDITIONAL STRENGTHS

Problem-solving in technical and marketing workflows, technical support, research and documentation, teamwork, adaptability, structured learning, and clear written communication.
